

FACT FOLDER

Read & Write GOLD incorporates a desk research tool to help you revise or prepare information to write reports. This desk research tool allows you to capture text from any application, classify it, attach pictures and bibliography information and record its source. This information can be converted to a Word document, slide show or outputted to PDA to help studying and revision.

FACT MAPPER

This online mind mapping feature offers the User the ability to produce a visual representation of facts and ideas on screen. This is particularly useful when brainstorming, revising and drafting work. Mind Mapping has been shown to help children and adults with learning difficulties to achieve higher exam grades.

FACT FINDER

The Fact finder allows you to search the internet in one easy click. It will allow you to search the Internet directly from Microsoft Word.

STUDY SKILLS

You can use Study Skills to highlight text in Microsoft Word and in Internet Explorer using different colours. You can then collect the highlighted text and insert it into a new document. This is particularly useful when you have a large piece of text with multiple themes or categories that are important. You can give each category a different colour and collate each colour's information later. The Summary Feature allows users, while working in Word, to summarise a document by paring its content by 10% to 75%.

TRANSLATOR

Translator provides one-click translation of English words into Spanish, French, German or Italian. By simply selecting the word in any digital content, on-screen selections, accessible applications, website content or digital text-books, the Translator will automatically show the translation in the relevant language. In addition, these translations can be read by Read&Write 9 Gold. This simple-to-use function is perfect for ESL students.
