'Making access to reading happen for everyone'

'Text to Speech'

Kurzweil 1000 is a software package designed to allow **blind** or **visually impaired** computer users to access information, which is in **printed** or **electronic text** .

Using a computer generated voice, this package will :

- * read a document as you **type** it
- * read a document opened **from a file**
- * read text copied **from a web page**
- * read **ebooks** and **pdf files**
- * **scan** and read **printed material** eg books, handouts, letters, contracts etc.

All material or documents used with this software can be:

- * **converted into a sound file** eg .mp3 and can be listened to at home
- * saved as a **word** document and edited

**For more information about Kurzweil 1000,
just ask staff for details.**
