OurKidsCode
FAMILY CODING CLUBS

About OurKidsCode

What is OurKidsCode?

OurKidsCode is a fun way for parents of primary aged children to explore creative computing together with their kids.

We are building a network and community of **family coding clubs** across Ireland.

Families can sign-up for a Taster Workshop to see how it works. If we spark an interest, ongoing support is available for families who are interested in starting an OurKidsCode club.

How to get involved?

First step is to Register for a **fully funded** Taster Workshop so you can experience how OurKidsCode works.

No previous coding or computing experience is necessary.

Families just need to **bring a laptop** and some **enthusiasm**!

There is **no charge for families** to take part – however **availability is very limited** so don't miss the opportunity!

Tell me more about OurKidsCode...

- **It's not a drop and go activity!** Parents and kids work together in a family team.

- It's a **safe environment** for parents and kids to be **creative**, **playful,** informed, engaged, **curious** and **empowered** in their use of technology.

- Workshops and MeetUps are **very social!** It's an enjoyable way to get to know local families with kids with shared interests.

- Workshops are designed to be **inclusive and accessible**. Initial workshops are led by a facilitator, with families (kids included!) gradually taking over (this is optional)

- An expert free zone! **No technical experience necessary!**
